Product Overview

Professional Grain Harvesting Solution

The 4S-120 walking mini grain reaper is an advanced, self-walking harvesting machine designed for efficiency and ease of use. It is specifically engineered to harvest paddy and wheat across diverse terrains, including plains, hills, and slopes. With its compact, lightweight design and flexible performance, this machine offers a reliable solution for small to medium-sized fields, minimizing labor requirements while maximizing productivity.

Technical Specifications

Model	4S-120
Engine Power	7.5 HP
Applicable Terrain	Plains, Hills, Slopes, Small Fields
Suitable Crops	Paddy, Wheat

Operational Features

Key Advantages

- Lightweight construction
- Compact volume
- Flexible performance
- Simple operation
- Low batch-cutting
- No distance limits

Machine Type	Man-holding & self-walking harvester
