

Agricultural Drainage Water Pump

This water pump is designed for use in agricultural drainage and irrigation systems. It features a robust construction for reliable performance in demanding environments.

Overview

Professional Agricultural Drainage Pump

This high-performance water pump is specifically engineered for agricultural drainage and irrigation applications. Featuring a robust design, it is built to withstand demanding environmental conditions while maintaining efficient water transfer. The unit includes secure flanged connections to ensure reliable integration into existing piping systems.

Technical Specifications

Construction Features

- Robust housing
- Corrosion-resistant materials
- High-efficiency engineered impeller
- Secure flanged connectivity

Primary Application	Agricultural Drainage, Irrigation
Connection Interface	Flanged Inlet/Outlet

Performance

Durability Profile

Wear-resistant • Corrosion-resistant • Heavy-duty
