

Agricultural Drainage Water Pump

This water pump is designed for agricultural drainage and irrigation applications. It features a robust construction with multiple ports and openings for fluid connections and operation.

Overview

High-Efficiency Agricultural Water Pump

This robust water pump is specifically engineered for demanding agricultural environments, including drainage and irrigation tasks. Featuring a durable red-painted main body and a reinforced mounting flange, the unit is designed for long-term reliability and heavy-duty performance. Its integrated bracket design ensures secure, vibration-resistant installation for various fluid transfer applications.

Technical Specifications

Primary Applications

- Agricultural drainage
- Irrigation systems
- Fluid transfer operations

Construction Materials

Cast Metal Body, Reinforced Mounting Flange, Corrosion Resistant Finish

Mounting Type

Bracket-mounted with dual mounting holes
