

Agricultural Drainage Water Pump

This water pump is designed for agricultural drainage and irrigation applications. It features a robust construction with a red-painted body and silver-colored metal components.

Product Overview

Professional Agricultural Drainage Pump

This industrial-grade water pump is engineered specifically for high-efficiency agricultural drainage and irrigation tasks. Its robust design features a durable metal construction, ensuring longevity even in demanding outdoor environments. Equipped with a secure mounting flange and a precision-engineered cylindrical shaft, it offers stable installation and reliable performance for various water management needs.

Technical Specifications

Construction Details

- Robust metal construction
- Corrosion-resistant red protective finish
- Standardized multi-bolt mounting flange
- Integrated fluid inlet/outlet ports

Application Scope

Agricultural Irrigation, Field Drainage, Water Management
