

Agricultural Field Sprayer with Tank

This agricultural machinery is designed for field use, specifically for crop protection or fertilization. It features a robust design with a large fan, a liquid storage tank, and multiple nozzles for spraying or misting.

Product Overview

Professional Agricultural Field Sprayer

This robust agricultural field sprayer is engineered for efficient crop protection and fertilization tasks. Featuring a high-capacity liquid storage tank and a powerful fan-driven misting system, it ensures uniform coverage across large fields. Designed with a durable frame and safety-focused construction, this equipment is built to withstand the rigors of intensive agricultural use.

Technical Specifications

Key Design Features

- Integrated fan housing
- Safety cage for fan protection
- High-capacity liquid storage tank
- Precision nozzle distribution

Spraying Mechanism	Fan-assisted misting with multi-nozzle array
Construction Materials	Reinforced Steel Frame, Heavy-duty Plastic Tank, Safety Cage

Performance Metrics

Primary Application

Crop Protection • Fertilization • Field Spraying
