

Agricultural Inner Tube

This inner tube is designed for agricultural machinery wheels, offering reliable tire performance. The high-quality rubber construction ensures durability and resistance to punctures.

Product Overview

High-Performance Butyl Inner Tube

This agricultural inner tube is engineered from a high-quality, high-adhesive butyl rubber compound designed to withstand the rigorous demands of farm machinery. It offers superior airtightness and resistance to aging, heat, oxidation, and ozone, ensuring reliable performance across varying temperatures. By reducing inflation frequency and extending tire service life, this tube provides a durable solution that lasts 2-3 times longer than standard natural rubber alternatives.

Technical Specifications

| | |
|------------|--------------|
| Material | Butyl Rubber |
| Size | 14.9-24 |
| Valve Stem | TR218A |

Performance Metrics

Shelf Life Advantage

3 x

Longevity vs Natural Rubber

Key Performance Features

Aging Resistant, Heat Resistant, Oxidation Resistant, Ozone Resistant

Application

Compatible Equipment

- Tractors
- Harvesters
- Farm Implements
