

Agricultural Irrigation Water Pump

This water pump is designed for efficient fluid circulation in agricultural machinery. It features a durable cast housing, precision-engineered impeller for optimal flow rate, and robust bearings for extended service life.

Product Overview

High-Efficiency Irrigation Pump

This high-performance water pump is engineered for superior fluid circulation in agricultural settings. It features a durable cast housing and a precision-balanced impeller to ensure optimal flow rates during demanding irrigation and drainage tasks. With robust bearings for extended service life, this unit is a reliable choice for professional agricultural operations.

Key Performance Metrics

Performance Highlights

1 High

Flow Rate Efficiency

Technical Construction

Materials and Build

Cast Housing, Precision Impeller, Heavy-duty Bearings

Applications

Primary Applications

- Agricultural Irrigation
- Water Drainage
- Fluid Circulation
