

Agricultural Leaf Blower with 63.3ML Displacement

This blower is designed for agricultural tasks such as clearing leaves and debris. It features an engine model 1E48FP, a 63.3ML displacement, and a power output of 2.7kw at 6800rpm.

Product Overview

High-Performance Agricultural Blower

This high-power agricultural blower is engineered for demanding outdoor tasks, including leaf blowing, debris clearing, and snow removal. Featuring a 63.3ML displacement engine, it delivers the consistent power required for professional landscaping and agricultural maintenance. Its robust design ensures reliability for heavy-duty use in various gardening and farm environments.
