

Agricultural Machinery Cabin for Harvesters and Sprayers

This cabin is designed for use in agricultural machinery such as harvesters and sprayers. It provides a safe and comfortable operating environment, protecting operators from the elements.

ADDITIONAL IMAGES

Product Overview

Robust cabin design suitable for harvesters and sprayers, providing a protected workspace for operators.

Professional Agricultural Machinery Cabin

This high-performance cabin is engineered for a wide range of agricultural and construction machinery, including harvesters, boom sprayers, and tractors. Designed with a focus on operator safety and comfort, the unit features a robust structural frame, high-visibility glazing, and integrated electrical systems. Our cabins are fully customizable to meet specific operational requirements, ensuring seamless integration with your existing equipment fleet.

Technical Specifications

Detailed view showing exterior lighting, mirrors, and glass paneling for enhanced operational visibility.

Durable frame construction designed for longevity and operator safety in demanding agricultural environments.

Key Design Features

- Fully enclosed structure
- Optimized visibility glazing
- Integrated lighting system
- Windshield wiper system
- Ergonomic interior layout

Electrical System

KET Connectors, Integrated Wiring Harness, Electronic Monitor Instrumentation

Applications

Fully enclosed cabin structure compatible with a wide variety of agricultural machinery models.

Compatible Equipment

Harvesters • Boom Sprayers • Cotton Pickers • Tractors • Excavators • Loaders • Road Rollers • Drilling Rigs

Service & Quality

Quality Commitment

Focus on stability, reliability, and precision engineering with rapid communication and flexible customization options.
