

Agricultural Material Crusher Machine

This crusher machine efficiently grinds and processes various agricultural materials. Its robust construction includes a blue frame, green electric motor, a feeding hopper, and a safety guard.

Product Overview

Versatile Agricultural Processing

This agricultural material crusher is engineered for the efficient grinding and processing of a wide variety of crops and materials. Its robust construction, featuring a durable frame and reliable electric motor, ensures consistent performance for small to medium-scale operations. Designed to handle everything from grains like corn and wheat to fibrous materials such as straw and vines, this machine significantly enhances productivity while reducing manual labor requirements.

Processing Capabilities

Material States

- Dry powder
- Wet powder
- Dry crops
- Fresh crops

Processable Materials

Corn, Beans, Wheat, Rice, Sweet Potato, Peppers, Medical Materials, Straw, Peanut Vines

Design & Construction

Design Features

Compact Design • Robust Frame • Safety Guard • Easy-Feed Hopper
