

Agricultural Mist Duster with 41.5ml Engine

This spraying machinery features a 1E40F-3Z engine with a 41.5ml displacement, delivering 2.13kw power at 7500rpm. Weighing 11.5kg, it is designed for plant protection and garden spraying in agricultural settings.

Overview

Professional Agricultural Mist Duster

This portable mist duster is a versatile tool designed for efficient plant protection and large-scale spraying tasks. It is widely utilized for the application of pesticides, as well as for epidemic prevention and disinfection protocols. Engineered for reliability, this machine provides the power and portability needed for demanding agricultural and garden maintenance environments.

Technical Specifications

Engine Model	1E40F-3Z
Engine Displacement	41.5 ml
