

# Agricultural Power Sprayer with Plunger Pump

This power sprayer is designed for agricultural and horticultural plant protection. It is suitable for large spraying operations in orchards, coffee, and ground crops, and can also be used for washing vehicles.

## Overview

### High-Performance Agricultural Power Sprayer

This robust power sprayer with a plunger pump mechanism is engineered for both agricultural and industrial applications. It features multiple outlets and adjustable pressure settings, allowing for precise flow regulation during operation. Designed for durability and stability, it is an ideal solution for the efficient application of pesticides, herbicides, and cleaning solutions.

## Technical Specifications

Pump Mechanism	Plunger Pump
Suitable For	Pesticides, Herbicides, Cleaning Solutions, Industrial Use

## Features

### Key Features

- Multiple output ports
- Adjustable pressure settings
- Integrated pressure gauge
- Precision control valves
- Sturdy base for stability

### Construction

Durable Materials • High-Pressure Ready
