Product Overview

High-Performance Power Sprayer

This high-pressure power sprayer is engineered for demanding agricultural and industrial applications, including the distribution of pesticides, herbicides, and fertilizers. Featuring a robust pump mechanism with corrosion-resistant brass components, it ensures long-term durability and reliable performance in fields, orchards, and greenhouses. The unit is equipped with a precision pressure regulation system and gauge, allowing for accurate control during operation.

Technical Specifications

Max Pressure

1500 psi

Max Pressure

Key Features

- Adjustable pressure settings
- Integrated pressure gauge
- Sturdy mounting base for stability
- Lubrication system with oil filler cap
- Heavy-duty motor with pulley drive

Build Materials

Brass Pump Body, Stainless Steel Components

Applications

Ideal Applications

Agriculture • Pesticide Spraying • Herbicide Application • Industrial Cleaning • Orchard Maintenance
