

Agricultural Power Tiller for Soil Preparation

This agricultural power tiller is designed for efficient soil preparation and cultivation. Its durable construction and adjustable settings make it a reliable solution for preparing land for planting on small to medium-sized farms.

Overview

High-Efficiency Agricultural Power Tiller

This robust power tiller is engineered for high-performance soil preparation and cultivation across diverse agricultural environments. It delivers significant torque to handle various soil conditions efficiently, ensuring reliable performance for small to medium-sized farming operations. With adjustable tilling parameters and ergonomic controls, this machine is designed to maximize field productivity and ease of operation.

Performance

Key Performance Metrics

1 High Torque

Tilling Capability

Features

Operational Features

- Adjustable tilling depth
- Adjustable tilling width
- Ergonomic control system
- High-torque engine output

Application Suitability

Soil Preparation, Cultivation, Small Farms, Medium Farms

Construction

Build Quality

Durable Construction • High Maneuverability
