

Agricultural Power Tiller

This agricultural power tiller is designed for soil cultivation. It features a sturdy frame, large tires, and a single-cylinder engine, suitable for heavy-duty use.

Overview

Robust Agricultural Power Tiller

This heavy-duty power tiller is engineered for demanding agricultural environments, offering reliable performance for tilling and plowing tasks. Featuring a sturdy frame and large, high-traction treaded tires, it ensures stability and efficiency across various soil conditions. The design includes an integrated operator seat and intuitive control levers, prioritizing both durability and ease of operation for professional fieldwork.

Technical Specifications

Primary Applications

- Tilling
- Plowing
- General agricultural field work

Color Scheme

Red • Blue

Engine Configuration

Single-cylinder engine

Design Features

Heavy-duty frame, Treaded tires, Front-mounted attachment, Operator seat
