

Agricultural Spray Machine with Honda Engine

This agricultural spray machine is designed for efficient spraying applications. It is equipped with a 5.5 HP Honda GX160 engine, delivering reliable performance for various spraying tasks.

Overview

Professional Agricultural Spraying Performance

This high-pressure agricultural spray machine is engineered for reliability and efficient performance in demanding farming environments. Powered by a robust 5.5 horsepower engine, it ensures consistent output for effective spraying across orchards and large gardens. The unit features a durable build and an ergonomic design for improved maneuverability, making it an essential tool for agricultural professionals.

Technical Specifications

Maximum Pressure

5 MPa

Max Pressure

Suction Capacity	41 L/min
Engine Power	4 kW
Engine Horsepower	5.5 hp

Identification

Article Number	LP413
Model Name	LP413
