

Agricultural Tire 3.00-4 for Gardening Tools

This agricultural tire is designed for gardening tools. It features a knobby tread pattern for enhanced traction in soft soil and is constructed from durable rubber with a yellow painted metal wheel hub.

Product Overview

Rugged Performance for Gardening

This 3.00-4 agricultural tire is engineered specifically for gardening tools and small utility equipment. It features a specialized knobby tread pattern designed to provide superior traction and stability when operating on soft or uneven soil surfaces. Built for durability, this product is the ideal choice for reliable low-speed, off-highway maintenance work.
