

Agricultural Tractor for Farming Operations

This tractor is designed for various agricultural tasks. It features a robust chassis and a comfortable operator seat.

Overview

Versatile Agricultural Tractor

This medium-sized agricultural tractor is designed to provide reliable performance for diverse farming operations. Featuring a robust chassis and powerful diesel engine, it is engineered for demanding tasks like plowing, tilling, and general field work. Its ergonomic design includes a comfortable operator seat and specialized high-traction tires, ensuring efficiency and operator safety during long working hours.
