

Agricultural Tractor for Farming Operations

This tractor is designed for agricultural tasks. It features large, knobby tires for traction and a robust construction suitable for various farming operations.

Product Overview

Professional Agricultural Tractor

This medium-sized agricultural tractor is engineered for versatility and reliability across diverse farming operations. Its robust construction features high-traction knobby tires and a high-efficiency engine cooling system, ensuring consistent performance in demanding field conditions. Designed with an ergonomic operator station, it provides the essential utility needed for daily agricultural productivity.
