

Agricultural Tractor with Roll-Over Protection

This agricultural tractor is equipped with a roll-over protection structure (ROPS) for enhanced operator safety. It is designed to perform a variety of farming tasks.

Product Overview

Robust Agricultural Utility

This agricultural tractor is engineered for reliability and operator safety in demanding field environments. Featuring a rugged design with high-traction knobby tires, it is built to handle diverse off-road conditions with ease. The integrated roll-over protection structure (ROPS) provides critical safety for the operator, ensuring peace of mind during daily farming operations.
