

Agricultural Trailer with Gridded Cargo Bed and Liquid Tank

This trailer is designed for attachment to power machinery such as tractors, featuring a robust frame and a gridded cargo bed for secure transport. It also includes a cylindrical tank, possibly for liquid transport, mounted on the front section.

Product Overview

Versatile Agricultural Transport

This robust agricultural trailer is engineered for high-performance hauling in demanding field and construction environments. Featuring a unique combination of a gridded cargo bed for secure material transport and an integrated cylindrical liquid tank, it provides a dual-purpose solution for modern farms. The single-axle design ensures excellent maneuverability, allowing for efficient operation when pulled by tractors or similar power machinery.

Technical Specifications

Design Type	Single-axle trailer
Key Features	Gridded Cargo Bed, Liquid Transport Tank, Tractor Compatible, Heavy-Duty Frame

Usage

Suitable Applications

- Agricultural hauling
- Construction site materials transport
- Liquid transfer and distribution
- General farm logistics
