

Agricultural Water Pump

This water pump is designed for agricultural drainage and irrigation systems. It features a durable housing and efficient impeller design.

Overview

High-Performance Agricultural Water Pump

This industrial-grade water pump is engineered specifically for demanding agricultural drainage and irrigation environments. It features a robust, durable housing paired with an optimized impeller design for maximum fluid transfer efficiency. With advanced sealing technology, the unit ensures reliable, long-lasting operation in various field conditions.

Key Features

Suitable Applications

Agricultural Irrigation, Field Drainage, General Pumping

Design Specifications

Build Characteristics

- Durable exterior housing
- High-efficiency impeller design
- Industrial-grade sealing system
