

Agricultural Water Pump

This water pump is designed for agricultural drainage and irrigation systems. It features a cast aluminum housing for durability and corrosion resistance, ensuring efficient water transfer.

Product Overview

High-Efficiency Agricultural Water Pump

The CH105 agricultural water pump is engineered for robust performance in drainage and irrigation systems. Built with a durable cast aluminum housing, it offers excellent corrosion resistance for demanding agricultural environments. This unit is designed to provide reliable water transfer, ensuring optimal flow rates and pressure for essential field water management.

Technical Specifications

Housing Material	Cast Aluminum
Model Identifier	CH105

Application & Features

Key Benefits

- Robust cast aluminum housing
- Corrosion resistant construction
- Optimized flow rate for irrigation
- Engineered for long service life

Primary Applications	Agricultural Irrigation, Drainage Systems, Water Management
----------------------	---
