

Agricultural Water Pump

This water pump is a robust and efficient solution for agricultural drainage and irrigation needs. Designed for reliable performance in demanding environments, it provides consistent water flow for various applications.

Product Overview

Robust Agricultural Solution

The C105 water pump is engineered for high-performance agricultural drainage and irrigation. Its design prioritizes durability in demanding field environments, ensuring consistent water delivery. Built with corrosion-resistant materials, this unit offers long-term reliability and minimal maintenance requirements for busy agricultural operations.

Technical Specifications

Housing Material	Corrosion-resistant material
Inlet/Outlet Connection	Flanged

Features

Key Features

- Integrated bypass valve for pressure regulation
- Flanged connections for secure installation
- Corrosion-resistant housing
- Designed for heavy-duty drainage and irrigation

Application

Suitable Applications	Irrigation Systems, Agricultural Drainage, General Water Transfer
-----------------------	---
