

# Agricultural Water Pump for Irrigation

This water pump is designed for agricultural machinery, specifically drainage and irrigation systems. It features a robust construction with a cast metal housing and a pulley system for efficient power transfer.

## Product Overview

### Professional Irrigation Performance

This agricultural water pump is engineered specifically for demanding drainage and irrigation applications. Its robust cast metal housing ensures long-term durability, while the integrated pulley system allows for efficient and reliable power transfer. Designed for professional agricultural environments, this pump provides consistent water flow to maintain optimal crop hydration and field management.

## Technical Specifications

Housing Material	Cast metal
Drive System	Pulley system
Primary Applications	Agricultural Irrigation, Drainage Systems, Machinery Integration
