

Agricultural Water Pump for Irrigation

This water pump is designed for agricultural drainage and irrigation systems. It features a robust construction for durability and efficient water transfer.

Product Overview

High-Performance Agricultural Irrigation Pump

This industrial-grade water pump is engineered specifically for large-scale agricultural drainage and irrigation requirements. It features a robust, durable construction built for continuous, reliable operation in demanding outdoor environments. The integration of a multi-groove pulley system ensures optimized power transmission, maximizing efficiency and performance during water transfer and distribution tasks.

Technical Specifications

Construction

Heavy-duty • Durable • Industrial Grade

Primary Applications

Agricultural Irrigation, Drainage Systems, Water Distribution

Power Transmission

Multi-groove pulley system
