

Agricultural Water Pump for Irrigation

This water pump is designed for agricultural drainage and irrigation systems. It features a multi-groove pulley for efficient power transfer and multiple ports for versatile connection options.

Product Overview

Professional Agricultural Irrigation Solution

This high-performance water pump is engineered specifically for demanding agricultural drainage and irrigation requirements. It features robust construction to ensure long-term durability in field environments and a sophisticated multi-groove pulley system for highly efficient power transfer. With versatile connection ports, this unit is designed to provide reliable water delivery across various farming applications.

Technical Specifications

Key Components

- Multi-groove pulley
- Multiple connection ports
- Reinforced housing

Model Identifier	ROOT206T101C
------------------	--------------

Application

Primary Applications	Agricultural Irrigation, Field Drainage, Water Management
----------------------	---
