

Agricultural Water Pump for Irrigation

The water pump is designed for efficient fluid transfer in agricultural drainage and irrigation systems. Its durable construction ensures reliable performance in demanding environments.

Product Overview

Designed for Reliability

The F102 water pump is a robust solution designed for high-efficiency fluid transfer in agricultural irrigation and drainage systems. Engineered with corrosion-resistant materials, it provides a long service life and reliable performance in demanding, real-world environments. Its compact design facilitates easy installation, while the precision-engineered impeller ensures consistent water delivery.

Technical Specifications

Drive System	Multi-groove pulley (belt-driven)
Impeller	Precision-engineered
Material Grade	Corrosion-resistant, Robust construction

Applications

Primary Applications

- Agricultural irrigation
- Drainage systems
- Water circulation
- General fluid transfer
