

Agricultural Water Pump for Irrigation and Drainage

This water pump is designed for agricultural drainage and irrigation. It features a durable cast iron housing, engineered for high flow rate and optimal pressure, suitable for various agricultural settings.

Product Overview

Robust Agricultural Water Management

The HN101 water pump is a robust and efficient solution specifically engineered for agricultural drainage and irrigation applications. Constructed with a durable cast iron housing, it ensures long-lasting performance and high resistance to corrosion. Its compact design facilitates easy installation and maintenance, making it a reliable choice for effective water transfer in diverse farming environments.

Technical Specifications

Key Performance Features

- High flow rate
- Optimal pressure delivery
- Corrosion-resistant housing
- Compact and maintainable design

Housing Material	Cast Iron
Primary Applications	Irrigation, Drainage, Water Transfer
