

Agricultural Wheel Tractor for Plowing and Planting

Wheel tractors are designed for agricultural applications such as plowing, planting, and harvesting. These tractors feature robust engines, heavy-duty tires, and versatile hitches for attaching various implements.

Overview

Professional Agricultural Wheel Tractor

This series of wheel tractors is engineered for versatile agricultural operations, including plowing, planting, and harvesting. These machines feature robust engine configurations and heavy-duty tires designed to perform reliably across diverse farming environments. With flexible hitch systems, they support a wide array of implements to maximize operational efficiency on the field.

Technical Specifications

Available Models

- 404
- x904
- x1204

Key Design Features

Robust Engine • Heavy-duty Tires • Versatile Hitch System

Primary Applications

Plowing, Planting, Harvesting
