

AGU Fuse Holders

AGU Fuse Holders are designed for high current applications, handling currents from 30-100 Amps. They incorporate oversized contact areas to ensure efficient current transfer, along with oversized set screws for reliable connections.

Product Overview

High-Performance AGU Fuse Holders

These AGU fuse holders are engineered for high-current applications, supporting ranges from 30 to 100 Amps. Designed with oversized contact areas, they ensure efficient current transfer and reliable electrical performance. Built with oversized set screws, these holders provide secure and stable connections for demanding automotive audio and electrical systems.
