

Air Bearing Casters for Cleanroom Machinery

These 60T air bearing casters are designed for moving heavy machinery. Each set includes a control console, main hose, and four vice air hoses.

Overview

Air Bearing Load Moving System

This air bearing caster system, also known as an air skate or air rigging system, is engineered to simplify the movement of heavy loads in sensitive environments. Designed for cleanroom machinery, the system utilizes modular air casters to provide stable, controlled, and efficient transport. Each kit is built with a focus on quality, safety, and reliability to ensure professional machinery relocation.

System Components

Included Components

- 6 x Modular air casters
- 1 x Control console
- 1 x Main hose
- 4 x Vice air hoses (6 meters each)

Performance & Warranty

Warranty	1 year
Design Principles	Quality, Safety, Reliability, Cost-effectiveness

Applications

Ideal Use Cases

Cleanroom Machinery • Heavy Load Moving • Sensitive Environments
