

Air Bearing Kit for Heavy Load Movement

Air casters facilitate load maneuvering in confined spaces. These kits employ air film technology for nearly frictionless movement of heavy machinery and equipment.

Product Overview

Air Film Transport Technology

These air bearing kits utilize advanced air film technology to create a nearly frictionless surface, allowing for the effortless movement of heavy machinery and equipment. Designed for precision and ease, the system maneuvers heavy loads into tight spaces using sets of four or six modules. The kits are built for durability and are suitable for diverse industrial applications including manufacturing, warehousing, and logistics.

Performance Specifications

Standard Capacities

- 10T
- 16T
- 20T
- 32T
- 48T
- 60T

Load Capacity Range

2 tons to over 100 tons

Configuration

Sets of four or six modules

Customization Available

Yes

Kit Components

Kit Type

Starter Kit

Included Components

Air bearing modules, Control unit, Hoses, Fittings
