

Air Blast Drying Oven, DHG-9003 Series

This oven features a stainless steel interior with rounded corners for easy cleaning. It is designed for controlled heating and drying applications.

Overview

Precision Air Blast Drying Oven

The DHG-9003 Series is a professional-grade drying oven engineered for precise temperature control and uniform heat distribution. Featuring a durable stainless steel interior with a mirror finish, it is designed for ease of maintenance and long-term reliability in laboratory and industrial settings. The unit utilizes a microcomputer PID controller and an advanced hot air circulation system to ensure consistent performance for drying, baking, and sterilization applications.

Key Features

Key Features

- Microcomputer PID temperature controller
- Forced hot air circulation system
- Adjustable blast and exhaust flow
- Mirror-finish stainless steel chamber
- Digital display with timer function
- Easy-clean interior with removable shelves

Safety & Control

Safety Systems

Temperature control protection, Independent temperature-limiting alarm, High-temperature resistant silicon gasket
