

Air Brake Chamber Assembly for Commercial Vehicles

This heavy-duty air brake chamber assembly is designed for air brake systems in commercial vehicles. It delivers consistent braking force with service and emergency brake functions, suitable for trucks, buses, and trailers.

Product Overview

Heavy-Duty Air Brake Solution

This heavy-duty brake chamber assembly is engineered specifically for air brake systems in commercial vehicles, including trucks, buses, and trailers. Featuring a robust construction and a durable diaphragm, it is designed to deliver consistent braking force for enhanced safety and control. The unit integrates both service and emergency brake functions, providing a comprehensive and reliable solution for demanding braking applications.

Technical Specifications

Braking Functions

- Service Brake
- Emergency Brake

Application Compatibility

Trucks, Buses, Trailers

Key Features

Performance Focus

Heavy-Duty Construction • Consistent Braking Force • Reliable Diaphragm
