

Air Caster Rigging System for Heavy Load Transport

This air caster rigging system is designed for moving heavy loads with ease and precision. It utilizes air film transporters with capacity from 2 tons to over 100 tons, with standard capacities including 10T, 16T, 20T, 32T, 48T, and 60T.

Product Overview

Heavy-Duty Air Caster Rigging System

This advanced air caster rigging system provides a superior method for moving and handling heavy cargo of any weight or shape. By utilizing air bearing technology, the system creates a low-friction environment that allows for the precise, safe, and smooth transport of machinery and industrial equipment. Designed for versatility, the system supports a wide range of load capacities and is suitable for diverse industrial and commercial applications.

Performance Metrics

Load Capacity Range

2 Tons

Minimum Capacity

100 Tons

Maximum Capacity

Standard Capacity Models

- 10 Tons
- 16 Tons
- 20 Tons
- 32 Tons
- 48 Tons
- 60 Tons

Customization

Customization	Yes
Customization Policy	Custom configurations are available if standard models do not meet specific operational requirements.

Features

Suitable Applications

Industrial Machinery • Heavy Equipment • Commercial Cargo • Large Appliances

Key Features	Air Bearing Technology, Low-Friction Movement, Floor Protection, Precise Maneuvering, Load Distribution
