

Air Caster Rigging System for Heavy Modules

This air caster rigging system is designed for transporting heavy modules and equipment. With careful use, it offers a durable solution that can last for more than ten years without requiring maintenance.

Product Overview

Air Caster Rigging System

This air caster rigging system is designed for the safe and efficient movement of heavy-duty industrial modules and equipment. Utilizing air bearing technology, the system distributes weight evenly to facilitate smooth transportation, making it an ideal solution for clean room environments and precise handling tasks. Built for durability, the system features a simple, user-friendly structure that requires no specialized training for operation.

System Components

- Air bearing movers
- Linked pads
- Central control unit

Technical Specifications

Expected Service Life

10 years

Maintenance Needs

Low to none

Features & Capabilities

Suitable Applications

- Heavy equipment handling
- Clean room moving
- Module transportation
- Industrial rigging

Key Features

Air Bearing Technology, Heavy Duty, Lightweight, Clean Room Compatible, Simple Operation
