

# Air Casters Application and Price List with Manual

This document details the application of air casters and includes a price list. It also provides manual instructions for air rigging systems.

## Product Overview

### Industrial Air Caster Systems

Air caster systems provide a safe and efficient solution for moving heavy, irregularly shaped, or oversized loads. By utilizing a thin film of compressed air, these devices create a near-frictionless layer, allowing for precise positioning without the need for heavy machinery. This system is environmentally friendly, electric-shock free, and designed to simplify material handling in demanding industrial environments.

## Performance Specifications

### Standard Load Capacity

**10 tons**

Minimum Capacity

**48 tons**

Maximum Standard Capacity

### Extended Capacity

Up to 100+ tons (customized design available)

## Operational Features

Power Source	Compressed Air
Ease of Operation	Yes
Training Required	No special training required
Key Benefits	Environmentally Friendly, No Electric Shock Risk, Cost Saving, Flexible Handling
