

Air Compressor for Pneumatic Applications

This air compressor is designed for a variety of pneumatic applications. It features a durable construction and efficient motor for consistent performance.

Product Overview

Robust Pneumatic Performance

The JWA30 compressor is a robust and reliable machine designed for a variety of pneumatic applications. Featuring a durable construction and efficient motor, it delivers consistent performance for professional tasks. Its compact design allows for easy portability and storage, while the integrated tank provides ample air storage for continuous operation.

Key Features

Built-in Capabilities

- Pressure monitoring gauges
- Adjustable pressure regulator
- Integrated safety features
- Quick-connect tool fittings

Usage & Applications

Suitable For

Professional Use, DIY Projects, Pneumatic Applications

Design

Design Advantages

Compact • Portable • Durable Construction
