Product Overview

High-Performance Air Compressors

These professional-grade air compressors are engineered for a wide range of pneumatic applications, offering versatile solutions for both industrial and workshop environments. With a comprehensive capacity range from 2L to 500L, these units provide reliable compressed air for various tools and heavy-duty equipment. Designed for durability and portability, the lineup features robust tanks and motor configurations to meet diverse operational needs.

Technical Specifications

Capacity Range

2 L

Minimum Capacity

500 L

Maximum Capacity

Power Configurations

- Electric motor models
- Gasoline engine variants

Design & Build

Application Suitability

Industrial Use • Professional Workshop • Pneumatic Tools

Design Features

Horizontal Tank, Portable, Wheeled, Protective Motor Cage
