

# Air Compressor Pressure Switch

This pressure switch is designed for use with air compressors. It automatically regulates pressure within the air compressor's tank by starting and stopping the motor based on pre-set pressure levels.

## Product Overview

### Automated Pressure Control

This pressure switch is engineered to automatically regulate the air pressure within your compressor tank. It ensures optimal performance and safety by precisely starting and stopping the motor based on pre-set pressure thresholds. Its robust design features a durable housing suitable for diverse industrial and professional air compressor applications.

## Electrical Specifications

### Rated Voltage

- 110V
- 230V

### Maximum Current

16 A

### Protection Grade

IP20

## Operational Metrics

### Key Performance Metrics

**12 bar**

Max Pressure

**55 °C**

Max Temperature

### Pressure Range

1.0-12 bar

## Installation

### Connection Types

Connection Style	Specification
One-way	Z1/4"
Four-way	G1/4"

### Compatibility

Air Compressors
