

Air-Conditioned Double-Deck Coach with Semi-Cushioned Seats

This air-conditioned double-deck coach is designed for passenger transport and features a double-deck configuration to maximize seating capacity. The semi-cushioned seats provide a balance of comfort and durability.

Product Overview

High-Capacity Rail Transportation

The SYZ25B air-conditioned double-deck coach is specifically engineered for efficient, high-volume passenger transport in modern railway systems. Its double-deck design maximizes seating density while maintaining passenger comfort through integrated climate control systems. Equipped with semi-cushioned seats, the carriage provides an optimal balance of durability and relaxation for long-distance travel.

Technical Specifications

Model Identifier	SYZ25B
Seat Configuration	Semi-cushioned, Double-deck

Features

Climate Control	Yes
-----------------	-----

Application

Primary Application	Railway transportation systems
