Product Overview

High-Efficiency Carbon Filtration

This carbon filter mesh is engineered specifically for air conditioning systems, providing a robust solution for maintaining indoor air quality. Featuring a durable grid-like structure, it effectively captures dust, pollen, and various airborne particles. The integrated activated carbon material works to neutralize odors, making it an essential component for optimal climate control performance.

Technical Specifications

Construction

- Durable plastic frame
- Fine mesh filter material
- Grid-like structure

Filter Type

Activated Carbon Filter Mesh

Key Functions

Odor Removal, Dust Filtration, Particle Capture, Air Quality Improvement

Compatibility & Use

Application

Replacement or upgrade part for air conditioning and ventilation equipment
