

Air Conditioner Evaporator Fin Assembly

Replacement evaporator fin assembly designed for air conditioning units. It facilitates efficient heat exchange with its radiating fin design and includes electrical connectors for control system integration.

Product Overview

High-Efficiency Evaporator Assembly

This replacement evaporator fin assembly is engineered for optimal heat exchange performance in air conditioning systems. Featuring a robust circular metal core with precision-radiating fins, it ensures consistent cooling efficiency. The unit comes equipped with integrated electrical connectors, facilitating seamless compatibility and straightforward installation for maintenance and repair professionals.

Technical Specifications

Design Features

- Circular metal core
- Radiating fin structure
- Integrated electrical connectors

Construction

Durable Materials • High-Efficiency

Component Type

Evaporator Fin Assembly

Installation and Compatibility

Installation

Designed for easy installation and compatibility with various air conditioner models.
