

Air Conditioner Fan Motor

This is a replacement fan motor for air conditioners. The compact, robust motor is designed for efficient and reliable operation.

Product Overview

High-Efficiency Air Conditioner Replacement Motor

This compact and robust fan motor is engineered for reliable operation in a variety of air conditioning units. Featuring a durable metal housing and integrated mounting brackets, it ensures a secure installation and optimal airflow performance. It is designed to provide consistent cooling efficiency for professional HVAC maintenance and repair applications.

Technical Performance

Performance Highlights

60

Motor Modulus

2086 A

Full Load Amps (FLA)

Rotation Direction

CCW (Counter-Clockwise)

Safety & Protection

Protection Features

Thermally Protected

Mechanical Design

Housing Material

Durable metal housing

Mounting Configuration

Integrated mounting brackets for secure installation

Application

Recommended Use

- Air conditioning unit replacement
- HVAC system maintenance
- Airflow optimization
