Product Overview

High-Performance Condensate Management

This ultra-quiet condensate removal pump is engineered for efficient water drainage in air conditioning systems, effectively preventing overflow and potential water damage. Featuring a sophisticated water level probe design and an integrated overflow alarm, it ensures reliable and continuous operation. Its split design allows for flexible installation, making it an ideal solution for residential, commercial, and industrial climate control environments.

Technical Specifications

Maximum Head

10 m
Max Head

Model Number

QD-PU02

Key Features

Design Features

Ultra-quiet operation, Water level probe design, Overflow alarm, Split design

Application

Ideal Applications

- Residential Air Conditioning
- Commercial HVAC Systems
- Industrial Cooling Units
