

Air Conditioning System Flush Gun Kit

This air conditioning system flush kit includes a flush gun, pressurized flush cylinder, and hose. The flush gun is designed to deliver solvent through air conditioning components to remove contaminants.

Product Overview

Professional AC System Flushing Solution

This Air Conditioning System Flush Gun Kit is a professional-grade tool designed to effectively remove contaminants, moisture, and acid from A/C components. Constructed from durable aluminum alloy and brass, it ensures reliable performance during system maintenance. The kit features a 900ml capacity cylinder and is compatible with a wide range of common refrigerants, making it an essential addition to any automotive or HVAC service workshop.

Technical Specifications

Working Pressure

90 psi

Min Pressure

150 psi

Max Pressure

Internal Volume

900 ML

Connection Types

1/4 SAE, 1/4 NPT

Compatibility

Supported Refrigerants

- R134a
- R12
- R22
- R410a
- R404a

Material & Design

Materials

Aluminum Alloy, Brass

Hose Color

Yellow
