

Air-Cooled Diesel Engine F6L912 F6L912T

The Deutz F6L912 and F6L912T are air-cooled, four-stroke diesel engines. These engines are known for reliability and durability in various industrial and mobile applications.

Overview

High-Performance Air-Cooled Diesel Engines

These air-cooled, four-stroke diesel engines are engineered for reliability and durability in demanding industrial and mobile applications. Featuring a robust, modular design with individual cylinder heads, they ensure ease of maintenance and long service life. Available in naturally aspirated and turbocharged configurations, these engines provide versatile power solutions for construction, agricultural, and power generation equipment.

Technical Specifications

Engine Model Specifications

Model	Cylinders	Displacement (L)	Power Range (KW)	Weight (Kg)
F2L912	2	1.88	14-22	240
F3L912	3	2.828	24-38	275
F4L912	4	3.77	32-44	300
F4L912T	4	3.77	40-50	315
F6L912	6	5.655	47-74	410
F6L912T	6	5.655	61-85	420

Performance

Cooling System	Air-cooled 4-stroke
Air Intake Methods	Naturally Aspirated, Turbocharged, Turbocharged Cooling
