

# Air-Cooled Diesel Generator

The air-cooled diesel generator provides a dependable source of electricity for critical operations. Its compact design allows for easy installation and portability, while its low maintenance requirements minimize downtime and operational costs.

## Overview

### Robust Air-Cooled Power Solution

This air-cooled diesel generator is engineered for reliability in demanding industrial and commercial environments. Featuring a rugged construction and an efficient cooling system, it ensures optimal performance under challenging conditions. Its compact design facilitates easy installation and portability, making it an ideal choice for construction sites, remote operations, and critical emergency backup power.

## Technical Specifications

### Cooling System

Air-Cooled

### Model Designation

F4L9130-30

### Engine Type

Diesel

## Application Suitability

### Suitable Applications

Construction Sites, Remote Locations, Emergency Backup, Industrial Use

## Performance Features

### Key Benefits

- Rugged construction for harsh environments
- Compact design for portability
- Low maintenance requirements
- High durability and longevity
