Product Overview

Reliable Power Generation

These air-cooled silent diesel generators are engineered for dependable performance in both backup and primary power applications. Designed for quiet operation, the units feature robust construction and integrated control panels for easy monitoring. Each generator includes essential safety features such as circuit protection and versatile output options for various electrical needs.

Technical Specifications

Operation

Silent

Frequency	50 Hz
AC Output Voltage	220V
DC Output	12V 8.3A
Cooling System	Air-cooled
Dimensions (TP10000DGS)	980 x 570 x 770 mm

Control & Safety

Control Panel Features

- Voltmeter
- Current Meter
- AC Switch
- Engine Switch
- Circuit Breaker
- Fuse Protection
- Output Indicators
